INFOWHYSE GMBH (GERMANY) ANNOUNCES THE LAUNCH OF ITS ALL NEW REPLY® INTERACT SERIES

Infowhyse, one of the world's leading providers of audience response (electronic voting) systems and solutions, is delighted to announce that Infowhyse GmbH has launched its new **Reply®** Interact Series of audience response systems.

Building on the success of our first-generation **Reply®** Interact model, Infowhyse is pleased to announce the launch of its all new Interact range (from left to right in the above illustration: **Reply®** Interact Mini, **Reply®** Interact (generation 2), **Reply®** Interact Plus and **Reply®** Interact Pro). With improved communication protocols, improved performance and improved functionality the new **Reply®** Interact Series, compatible with our Synthesis™/ Unity™/ Elect™ Software's as well as Edivote® and other Infowhyse Software's, is now available for immediate delivery.

The new Interact range from **Reply®** has been designed and built to provide the user with fast, reliable and secure systems which are quick to set up, easy to use and that provide high level functionality at the lowest possible cost.

The **Reply® Interact Mini** is designed for simplicity, small to medium size group applications and dedicated Yes/No/Abstain voting. The new **Reply® Interact mini** offers an LCD, a send button, a vote receipt to the LCD and a longer range than the standard **Reply® Mini** as well as operating with 2 batteries for longer life.

The **Reply® Interact** is already being used in interactive meetings, special events, and other feedback activities that the audio-visual industry commonly classifies as audience response, group response , or interactive voting . The new **Reply® Interact (gen 2)** introduces a correct/incorrect receipt to the LCD, 5-character feedback and dedicated yes/no/abstain capabilities.

The **Reply® Interact Plus** is designed for education and training specific applications as well as for general use in all types of other interactive meetings. The new **Reply® Interact Plus**, in addition to all the features of the **Reply® Interact**, provides SMS text capabilities, online or offline homework and examination capabilities as well as messaging back to the keypads.

The **Reply® Interact Pro** is designed for large scale meetings such as shareholder meetings and candidate elections as well as for general use in interactive meetings, special events, and other feedback activities where enhanced range is a factor. The new **Reply® Interact Pro**, in addition to all the features of the **Reply® Interact**, provides dedicated candidate election and batch resolution capabilities and is powered by rechargeable batteries to provide higher speed and longer range. Ideal for elections and most other large scale meetings.

The **Reply® Interact Series** works with our **Edivote®100** software, the free, trusted standard for voting with the **Reply®** range of audience response keypads, as well as many other software's in the Infowhyse Software Portfolio. Also with **Edivote®100** you can try out the **Reply® Byopad™**, our hybrid smartphone version, contained within.

Infowhyse GmbH established its operations in 2004, operating from their HQ offices in Bad Nauheim (near Frankfurt), Germany. Infowhyse has been at the forefront of audience response market development in its own right, as well as being the hardware provider, software developer and inventory hub for numerous resellers and service partner companies spanning some 30 countries.

In 2014 Infowhyse acquired the **Reply®** brand. **Reply®** is the foremost brand in the Audience Response System industry and for the last quarter of a century has been, as it remains today, one of the industry's most distinguished names with over six million keypads sold worldwide.
